WHERE'S THE COIN?

Shuffle and take a guess where the coin is…

Minimum System Requirements:

WAMP Server

To install:

1. Unzip the package into the www directory of your WAMP Server.
2. Go to the unzipped package directory with your localhost. This will launch the game into the browser.

Let the Game Begin!

1. To start, select the number of cups you want from the dropdown list and click START GAME.
2. The coin will be hidden inside the cup and the cups will be shuffled.
3. Once the shuffling ends, guess where the coin is by clicking in the cup
4. If you are right, you will advance into a higher level. This time though, the shuffling will be faster.
5. End the game by completing all the three levels.
